Subject: Re: New SMO in Utah County (S/049/055)

Lynn,

Per our PA, I've been able to run a file search on this project. There are no sites or surveys in the project area or surrounding area, so we don't have any known sites or evidence of high site density.

There is some small potential, as always, for the presence of archaeological sites in areas such as this, so your standard language on this issue would be good to attach. My recommendation for inventory in this case is based on the information I have at hand and my understanding of the area. Other archaeologists, with more or significantly different information or with different mandates might come to a different recommendation.

Per our PA with your office, in our opinion, this email completes your 9-8-404 consultation requirements.

Thank you for considering cultural resources.

Sincerely,

Matt

The Division has received a notice for a small mining operation from James B. Mascaro and Sons, LLC for their Barney mine in Utah County, Utah. The plan to conduct operations on approximately 5 acres. The project is located in portions of Sections 2 and 11 of T11N, R2W, SLBM. (see attached map)

They will be collecting surface and subsurface stone from this area.

The attached PDF file is a map of their proposed operations.

As per our MOU please provide your comments regarding cultural resources within 10 days.

Thank you for your consideration with this request.

Lynn Kunzler
